

FLOAT STOP ASSEMBLY GUIDE

IMPORTANT!

Float Stopper
74-23-2217

Float Switch Assy
76-23-4978

During transit or after washing your Water Reservoir the Float Stopper and the Float Switch Assembly may become dislodged. This is a safety measure and will prevent your FLAVIA® FUSION™ drinks station from working.

To ensure your brewer functions correctly, insert the "Float Switch Assembly" into the Water Reservoir in the position and orientation shown. Then insert the "Float Stopper" firmly in the position and orientation shown.
